**Manufacture Note:**  
During the manufacturing process this model of fence is bundled and packed in a nested format to maximise the loading volume on a vehicle. Each individual pack of panels is strapped very tightly together with metal banding to ensure the goods do not move in transit. This method of packing does however leave small indentations on the vertical tubes at the point where the vertical and horizontal tubes meet and may also result in the top of the vertical tube being slightly oval. Please be aware that this is not a manufacturing defect and will not affect the use of the product in any way.
